

How we help Financial Services businesses

Stop fraud in under 5 seconds

Quickly assess if an identity document is likely to be used to commit fraud in one of your branches by using our hardware scanner to perform full document authentication. Our advanced GBG IDscan technology can help you fight fraud, whilst meeting your compliance obligations.

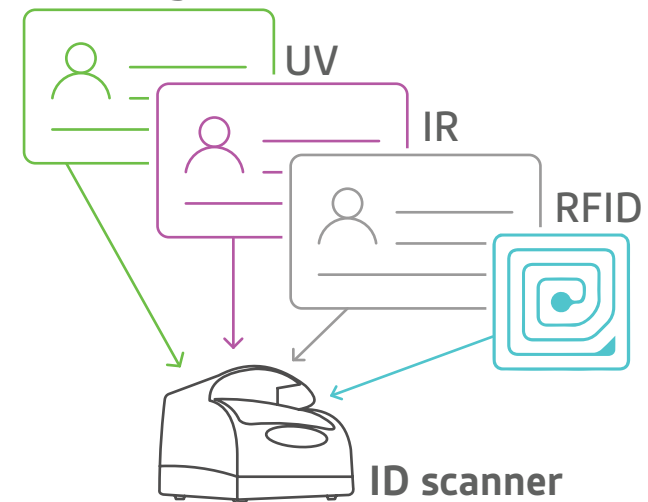

What GBG IDscan can do for you:

- **Reduce loss** - in a 6 month period, we saved the UK retail banking industry over £12 million in confirmed fraud prevention
- **Reduce costs** – speed up in-brand customer onboarding with automated checks, reducing human error and improving your customer experience
- **Build your reputation** – be known in the industry as a hard target for fraudsters, with a zero tolerance for forged documents

GBG | IDscan

White light

In addition to our unique technologies, we work closely with international fraudulent document units to detect and track the latest trends in document fraud innovations, so you can stay one step ahead of fraudsters.

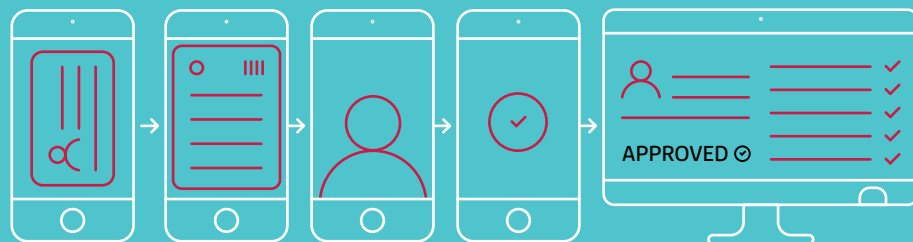

Speed up your digital onboarding

Onboarding your customers online couldn't be easier. With GBG IDscan's mobile and web technology, your customer simply captures an image of their ID document; our technology does the rest.

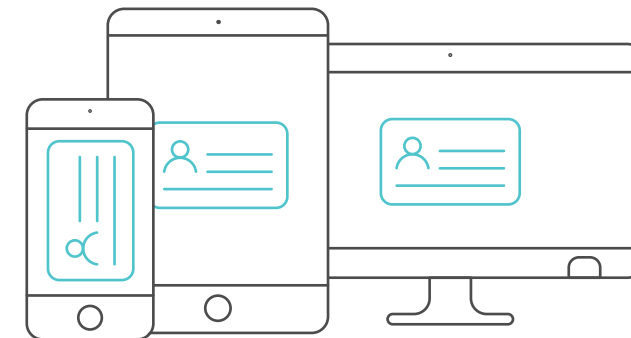

What GBG IDscan can do for you:

- Speed up your online customer experience
- Reduce drop offs and increase your conversion and customer acquisition rates
- Achieve operational efficiencies by reducing manual document processing
- Know your customers better through GBG IDscan Investigation Studio single customer view
- Easy to deploy SDK, available for iOS and Android, and an API for web browser integration

Capture your customers' details even faster, streamlining your application process and reducing drop offs. Automatically extract details from identity and Proof of Address documents in seconds.
